Why personal tuition?

Whenever you decide to start learning

Personal tuition in all aspects of home or business computing can offer most people the best way to enter the world of computers. Sometimes the thought of attending a course or classes can be a bit off-putting, since it can seem that everyone knows much more than you right from the offset. So, what could be more convenient and congenial than having your own computer expert on call to visit your

home or office, to deliver tailor-made tuition at a pace and time that suits you as an individual.

It may be that you are following a course at school or college leading to a qualification, like GCSE, AS/A Levels or some other form of vocational award. In these cases, a personal tutor will help you to examine the subject material and help you to overcome difficulties you may experience in understanding the course modules. **GAIN EVERY ADVANTAGE.**

Why learn about computers?

Apart from any need related to your education or profession, there is one major compelling reason to learn about computers. Quite simply, every aspect of our personal and professional lives is now touched by some form of computing or information technology. No matter what age or stage of life you are at it is likely that you will need to use a computing device to make each day pass smoothly and conduct your affairs. In many cases, such as Internet use or using bank ATM machines there is some risk of giving away sensitive information about yourself which means that you have to be sure that you have a good understanding of the key safety principles to apply.

Another very good reason for learning computers is to keep in closer touch with far-flung family, using email, or even webcams. And, of course, if you find getting to the shops difficult then the World-Wide Web offers wonderful opportunities to access home delivery services.

But, apart from the reasons given above, there is one other really good reason for learning about computers and their software programmes. **COMPUTERS ARE FUN.** They can offer a wealth of pathways into the information highway that could seriously enrich your life. Grasp the opportunity now!

Computers are becoming ubiquitous

Your Personal Tutor

Derek J Cunningham MBE BSc (Hons).

Derek has had over 30 years experience of programming and operating a wide range of computer systems during his two careers as first, a Deck Officer in the UK Merchant Navy, then, as an officer of the Royal Air Force. He is qualified to degree level in computers, computer programming and digital communications. In relation to his voluntary work as founder and chairman of a local disability football club, he has also had an Enhanced Criminal Records Bureau check, therefore assuring his clients of his integrity and discretion in all their dealings with him. During his RAF career, Derek has designed and delivered many training courses to teach NON-TECHNICAL staff about advanced IT and radar operating methods and has a knack for making difficult concepts seem very easy. He can offer a tuition service of the highest quality set at exactly the level needed by each client.

Derek's tuition services are available for a very affordable **£30 per hour**. Technical assistance and purchasing advice are also available.
